

Fr. 12 April	-	Setting up the seminar program for the semester
Fr. 26 April	S. A. Krasnokutski	<i>Forthcoming DFG project "The Search for DIB Carriers"</i>
Fr. 3 May	K.-J. Chuang and C. Jäger	Conference report: Laboratory Astrophysics: from Observations to Interpretation
Fr. 10 May	C. Jäger	Conference report: Dusting the Universe
Fr. 17 May	A. Potapov	<i>Chemistry on the surface of laboratory cosmic grains</i>
Th. 23 May 2:00 pm Seminar room Helmholzweg 3	K.-J. Chuang	<i>Prebiotic species formation in the early stage of molecular clouds</i>
Fr. 31 May	D. Strelnikov	Guest talk: <i>He-tagging gas-phase optical spectroscopy of astronomically relevant species</i> (also at Bunsentagung 2019)
Fr. 7 June	S. A. Krasnokutski	<i>Condensation of atomic carbon as a route towards glycine formation</i>
Fr. 21 June	H. Mutschke	<i>THz spectroscopy of forsterite powder</i>
Fr. 28 June	-	Astrochemistry: From Nanometers to Megaparsecs - A Symposium in Honour of John H. Black
