

Date	Speaker	Title or replacement event
Fr. 19 October	-	Setting up the seminar program for the semester
Fr. 9 November	K.-J. Chuang	<i>The formation of complex organics in dense clouds - Sweet results from the laboratory</i>
Fr. 16 November	C. Jäger	<i>Research project on origin of life</i>
Th. 22 November 5:15 pm Lecture Hall 2 Helmholtzweg 5	A. Potapov	Habilitation defense: <i>Laboratory astrophysics: Spectroscopy and instrumentation for the gas phase and the solid state</i>
Tu. 27 November	-	FOR2285 test talks
Fr. 7 December	H. Mutschke	<i>Sub-mm continuum absorption of silicate minerals</i>
Mo. 17 December	-	FOR2285 defense
Tu. 18 December		
Fr. 18 January	J. Greif	<i>Temperature-dependent sub-mm measurements of carbonaceous dust analogues</i>
Fr. 25 January	S. A. Krasnokutski	<i>Fullerene polymers as carriers of unidentified IR emission bands</i>
Fr. 1 February	A. Potapov	<i>IR spectroscopy of ice-silicate mixtures</i>
